What do Powerfirm's Clients Say?

“I have bought from Powerfirm a number of times and have always found them responsive and helpful. They're a good operation.”

“My goods arrived on time and I received helpful advice from Powerfirm in setting the equipment up. The team there are very friendly and really know their stuff.”

“The product knowledge of the Powerfirm team is outstanding and I like the personal service I receive from them.”

POWERFIRM

Ensuring data and IT systems are available and secure

Powerfirm is a national provider with proven expertise and knowledge in physical data centre infrastructure solutions and services

Ensure your physical infrastructure continues to support your IT needs in the long term with the flexibility of our managed infrastructure services, or by installing expandable, modular solutions.

Our people understand that all businesses and all facilities are unique and take the time to understand your business and IT requirements.

We help you choose the right solution for your organisation's particular needs, provide expert installation services and ongoing post-implementation support.

Clients Benefit From Our:

- In-depth product and industry knowledge
- Industry-certified staff
- People who understand the business drivers and challenges behind IT infrastructure projects
- Fast response times and personal service
- Modular solutions that grow with your business
- National sales and service coverage
- UPS workshop testing and battery disposal service
- eWaste services: ISO 14001 compliant disposal of lead acid batteries and IT equipment

Services:

Managed Infrastructure

By leasing your IT infrastructure through Powerfirm as a service instead of purchasing as an asset you can:

- Reduce your capital expenditure
- Simplify and improve accuracy of operational budgeting with a known monthly cost covering the entire project management process
- Avoid getting caught with obsolescent equipment
- Have 'one throat to choke' if anything goes wrong

Backed by Macquarie Finance, you know all of your costs up front with one simple monthly payment that covers the full life cycle of the solution: design, delivery, installation, monitoring & management, maintenance and disposal.

Project Management

Physical infrastructure design & implementation – Powerfirm can prioritise, plan, organise and deploy:

- Data centre build and implementation projects
- Installation services for electrical and physical infrastructure
- Data centre relocations and consolidation
- Data centre energy efficiency optimisation

Infrastructure Audit & Assessment

Identify any areas that need urgent attention and assess the maturity, stability and performance of your infrastructure.

Maintenance Programs

Comprehensive maintenance to ensure your infrastructure remains up-to-date, stable, secure, reliable and able to support your ongoing requirements.

Products & Solutions:

- Back-up Power
- Power Distribution
- Racks & Enclosures
- Precision Cooling
- Environmental Monitoring
- Physical Security
- Infrastructure Management
- Cable Management
